COFFEE

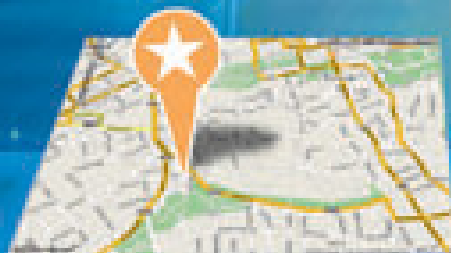

Yasmine
22-4-2012

I love coffee, really, really good coffee, this is why, while I'm in Cairo, my day starts at Cafe Greco. The coffee there is so good it will make you forget the lack of parking spaces on 9th Street and the high decibel of the noise once you get inside.

Guest house "Living with Art"

The guest house "Living with Art" is owned by Peter Ely, honorary consul of Germany and his wife Karin. They have a passion for Egypt and have been living here for over 20 years. Several years ago they realized their dream. Peter Ely, a civil engineer and Karin who owns the company 'style and steel' planned and furnished the guest house 'Living with Art', a unique concept and retrieve in the vivid city, right on top of the Hadaba overlooking the bay of Hurghada. Every one of the 19 guest rooms and apartments is individually furnished. Mrs Karin personally and her staff cook breakfast and dinner which is served for the guests in the beautiful restaurant. There is a courtyard surrounded by trees and flowers inviting one to read a book and relax, the roof is equipped with a Jacuzzi and a bar; everything is just perfect for a 'different' holiday. Here you feel at home!

Thursdays the roof is open for everyone: for a social gathering and to join 'Dance ... dance ... dance', an opportunity to take dance lessons which start at 7:30 pm, or to just pass by and meet with friends in the roof bar. Many residents of Hurghada and El Gouna come to the event every week, and also more and more tourists are taking the chance to join the get-together.

The guest house also hosts special events such as book readings, wine tastings, marriage and birthday parties, and various other occasions.

SILVER WEDDING

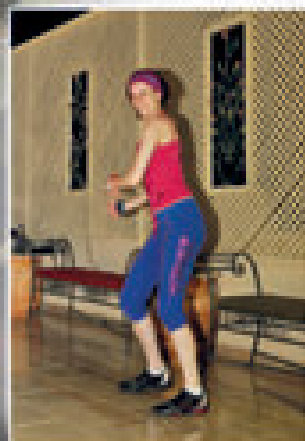

Friends of Steffi and Arthur organized a celebration for their 25th (silver) wedding anniversary. The couple was here for their holidays, and the party came as a big surprise for them. Steffi and Arthur promised to come back for their golden anniversary.

Congratulations to them from all of us!

DANCE ... DANCE ... DANCE

For everyone who likes to dance to rhythm of Cuban and Latin American music here are dance lessons on the roof terrace every Thursday starting at 7:30 pm, including express courses for Salsa, Bachata and Merengue; Tango lessons are also in the plan. Dance partners are not obligatory.

ZUMBA

Emeline Lavender, originally from the New York area and now living in Cairo, came over in June to hold Zumba lessons on the roof. Emeline worked in the United States as a dance trainer for 12 years, and became addicted to Zumba. She said: 'I love teaching Zumba because it actually makes working out fun. Also, it makes dance attainable to anyone! What better way to burn some calories than by dancing?'

Emeline has now been teaching Zumba in Cairo for over a year, and organizes large Zumba parties together with other Zumba instructors including the famous Samia Allouba from Egypt.

More information about Zumba in Cairo and Emeline:

For more information and reservations at the guest house 'Living with Art' please contact Mrs Karin Ely: 01222118338.

Orange Café

Hurghada - Egypt
Holland's Eatery

H.E. Mrs. Susan Blankhart

visits Hurghada to celebrate "Queensday". The ambassador of the Kingdom of the Netherlands in Egypt invited all the Dutch residents living in and around Hurghada for a reception in Orange Café. She also invited the representatives of other European countries, so the reception was attended by the honorary consuls of Britain, Belgium, Switzerland, England and Germany.

Orange Café was really proud to be the "place" for this special event. Mrs. Blankhart came also to say goodbye: she will take a new position in Sudan.

The organization by Mrs. A. de Jong (liaison for the embassy in Hurghada) was perfect.

Heineken have been sponsoring this event.

MÖVENPICK HURGHADA

VISITED BY THE HEAD OFFICE

On Thursday 24th May 2012, the recently rebranded Mövenpick Resort Hurghada, welcomed the Executive Board Members of Mövenpick Hotels & Resorts of Zurich.

Mr. Luitpold von Finck, Chairman of the Board of Directors Hotels & Resorts Mr. Jean Gabriel Pérès, President & CEO Mövenpick Hotels & Resorts Mr. Roger Kacou, Senior Vice-President Africa Mövenpick Hotels & Resorts.

During their visit to Hurghada the Executive Board Members visited the hotel and expressed their happiness for having such a wonderful property as part of the Mövenpick brand. Also the Executive Board Members met with Philippe de Vizcaya, General Manager and the management team of the Resort.

Picasso Exhibition @ Steigenberger Al Dau Beach Hotel

Karin Ely, co-owner of the guest house "Living with Art", is already famous for her exhibitions in the lobby of Steigenberger Al Dau. Currently there are 16 replicas of Picasso's graphic works of the years 1929 to 1961 on display.

Important for Mrs. Karin is to show that Picasso's work are not only large sized paintings and sculptures, but also the smaller graphics that were often altered and further developed. Therefore you find frequently the same motif in different stages of development, all signed by Picasso.

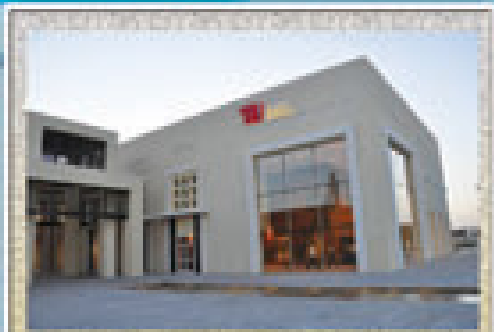

Hurghada Spring Ball @ Steigenberger Al Dau Beach Hotel

On the 18th of May residents enjoyed, for the first time in Hurghada, a real Ball organized by Sabirova Dance School with generous support from the management of Steigenberger Al Dau Beach Hotel who provided the spacious hall and services for this event.

It was really exciting to see everybody look so elegant with gorgeous dresses, like going back in time to another century. The honor to open the Ball had Peter Ely, Honorary Consul of Germany & his wife, Karin, Vladimir Karakulev and his wife, Monique, ballet stars from Russia (Bolshoi Theatre) and France. The welcome speech from hotel management was given by Karim Boushra. Adults and kids had a lot of fun together in different dances and special dancing games. This interesting program was prepared by Russian dance teacher Lidia Nikolaevna with her students. She was teaching them during the year not only dance, but also a special "high style" manner in which girls and boys learn to behave like little princes and princesses. It would be nice to keep and continue such a great new (but old) tradition that all the family can enjoy together!

All about dental implants

Part 13

Implants are very durable and will last many years

A very common reason people consider implants is because a sliding lower denture makes chewing and talking difficult. Implants can also replace individual teeth and partial bridges in the upper and lower jaws. The majority of patients treated with dental implants experience a significant improvement in their ability to chew food and feel more comfortable.

Dental implants are permanent fixtures of titanium posts anchored to the jawbone and topped with individual replacement teeth or a bridge that screws or cements into the posts. The success rate for implants is remarkable: 98 percent for lower implants and 91 percent for upper implants.

Nearly everyone who can have routine dental care can successfully use implants. Many people who consider implants have removable, conventional dentures for lower and upper jaws, or have removable bridges that clasp to adjacent teeth. A permanent bridge supported by 2-4 metal posts in the lower jaw, accompanied by a complete conventional denture for the upper jaw, is a very common use for dental implants for people who wear complete dentures. Dental implants include strategically placed posts -- one, a few or several -- which serve as artificial tooth roots for a permanent bridge of non-removable, stable, natural appearing replacement teeth, in many cases when patients have many of their own teeth remaining.

Single teeth or a full arch of teeth, which have been extracted due to injury or disease and replaced with a removable bridge, can be replaced with dental implants. The teeth can be replaced by a non-removable, fixed bridge or by an overdenture that may help with facial support. Implants are very durable, will last many years, and require the same maintenance as real teeth, including brushing, flossing and regular dental check-ups.

The models accurately show where the gaps are located and provide measurements for a replacement tooth or a bridge. Treatment with dental implants is complicated and takes meticulous planning for best results. Additional X-rays and models of the mouth may be necessary.

Good-bye back pain, hello healthy spine

Health- and mental coach Barbara Luigs is announcing the launch of her fitness programme here at the Red Sea. She is sharing exclusively with us the key focus of her new offer and also has some great advice on the factors influencing a healthy back.

Dear readers,

Most people take a functioning back for granted – until the moment some serious back pains prevent them from doing their daily job, enjoying their leisure time or simply getting out of bed in the morning with ease. During their medical treatment and subsequent supporting physiotherapy, they often ask themselves at which point of time in their life they missed the chance to exercise and if that could have prevented their pain.

Let me give you some background on the structure of our spinal cord before I answer this very valid question. Our spine consists of vertebrae and spinal discs, protecting the nerves that run through this pillar, and surrounded by muscles. The backbone plays a complex, important role in our life. The most obvious is that it keeps us upright – our head alone weighs on average of 4 kg that the spinal column must carry. But it is also a mirror for our attitude, our thinking and feeling. If for example, we lack stability in life, this often shows by raising the shoulders upwards or forwards, giving ourselves a feeling of protection.

In order to keep the spinal system healthy, it needs to be regularly exercised and fed. The good news is that the spinal discs are extremely resilient, the bad news is that from our early twenties on, they start showing the first degenerative occurrences. But don't despair, it is never too late to start your personal fitness programme.

Is there any way how you can support your back in your daily life? Certainly so. Already taking the stairs instead of the elevator, getting up once or twice per hour from your desk or sitting down when you have to work in a standing position is a first step in the right direction. A healthy diet with plenty of nutrients and drinking 2-3 litres of still water per day – which is recommended anyway in the dry climate here – adds to a healthy spinal disc.

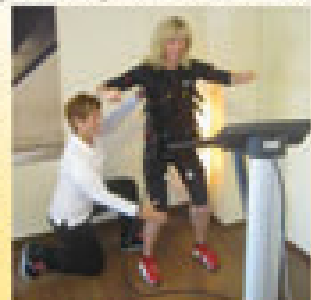

In my personal back therapy training we will go a step further. First, I will help you understand your back better and which habits you have acquired over time that are not doing good. In the next phase, we will analyse the individual strengths and weaknesses of your body, you will experience the effects of exercising and increasing the strength of the muscles that lend stability to the spine.

My philosophy is that this will only work if you have fun with the exercises. The other good news is that even if you thought so far you lack the time, you will be surprised to learn that with only 45 minutes per week, you can achieve great results. The

secret key to this is highly effective exercises and EMS training, especially for people with cardio-vascular issues. During the training, a device issuing a low frequency electric impulse, is attached to your body and reaches also muscles that are very hard to train otherwise with regular exercises.

Even if you have not found the time to exercise in the past, it will be easy to integrate doing something for your body and mind into your day-to-day life. Motivation plays a very important role in working with you and in this area you will see a difference when you work with someone who has a background as a mental coach like I do.

Besides motivation and fun, the participants of a personal back therapy training also benefit from a significant reduction in pain and relaxation of stiff muscles. And last but not least, it feels great to overcome one's weaker self! And if you are already an active outdoor person, the exercises will reflect your personal requirements, whether you are a diver, a golfer or a surfer/iteer.

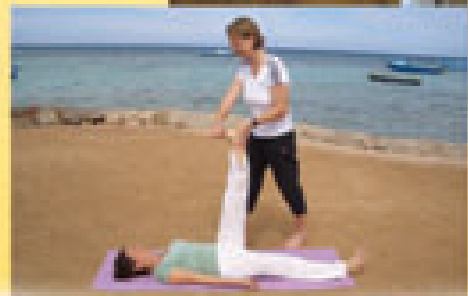

So what are you waiting for? Let's move!

To schedule an appointment with me, please send an e-mail to luigs@mein-gesundheitscoach.de or call me at +2 0127 562 36 71. For more information about my programme, please visit www.mein-gesundheitscoach.de

Yours Sincerely,

Barbara Luigs

Why training with me is different

My previous experience from working in an executive position in a corporate environment helps me better understand and deal with the time constraints of my customers as well as the physical challenges a daily routine sitting at a desk and working with a computer poses on the back.

I know from my own background how good it feels to regain a painless and stable back and enjoy exercises – and I know the limits of a body that has not been well trained for a while. After having worked with executives in Germany for many years in the areas of physical and mental fitness, I am now bringing this experience to the Red Sea, both for people spending their vacation here as well as the local residents.

Ramadan & «Eid al-Fitr» in Egypt!

Ramadan is a special month of the year for over one billion Muslims throughout the world, including the majority of the population in Egypt. It is a time for inner reflection, devotion to God, and self-control. Many Muslims think of it as a kind of tune-up for their spiritual lives. Fasting is important during Ramadan as it is a means of learning self-control. As a secondary goal, fasting is a way of experiencing hunger and developing sympathy for the less fortunate and learning thankfulness and appreciation for all you have. Furthermore fasting provides a break in the cycle of rigid habits or overindulgence. Ramadan is also a time of intensive worship, reading of the Koran, giving charity, purifying one's behavior, and doing good deeds.

The word Eid is an Arabic name that means a festivity, a celebration, a recurring happiness, and a feast. In Islam, there are two major Eids namely "Eid al-Fitr" (Festival of Breaking the Fast) celebrating the end of Ramadan and "Eid al-Adha" (Festival of Sacrifice) which coincides with the Hajj and commemorates Prophet Abraham's sacrifice of a sheep in place of Prophet Ismael.

Eid al-Fitr is celebrated by Muslims after fasting the month of Ramadan as a matter of giving thanks and gratitude to Almighty Allah. It takes place on the first day of Shawwal, the tenth month of the lunar calendar. Eid al-Fitr is a happy celebration with new clothes, gifts, and plenty of good food. Eid festivities usually last three days in Egypt with vacations for schools, universities and government offices. Some stores and restaurants are closed during Eid too. The Eid day starts with a small snack followed by Eid Praying (Salat al-Eid) in congregation attended by men, women and children. Afterwards neighbors, friends and relatives start greeting each other. The most common greeting is "Eid Mubarak" (Have a blessed Eid). Children are normally given gifts, which traditionally are new clothes to wear throughout the Eid. Also, women are customarily given special gifts by their loved ones.

Tax planning for projects and how to issue an invoice according to the Egyptian law

Many responsible employees of companies have not understand until now how to go about tax planning for their projects; this leads to a whole range of problems for the decision makers of these companies as well as increased tax payments. The fiscal rules have to be applied to the entire structure of the company, and the bases of costs have to be analyzed in detail in order to be able to establish exact cost accounting.

To be able to optimize income tax and other payments to the authorities on one side and to issue correct income statements and balance sheets in accordance to the Egyptian law on the other side it is very important to:

- Structure salaries and wages in coordination with the human resources manager and financial manager, in a correct income tax optimizing way
- optimize the calculation of social insurance payments and divide the resulting payment correctly between employee and employer
- deduct the applicable percentage from any invoice and declare it to the tax department
- calculate the stamp tax for every document
- ensure that the yearly income tax declaration is compatible with monthly sales tax declarations
- be accurate with income and expenses and have the right documents for them
- fill in the form for declaring income and the form for the General assembly according to the Egyptian accounting rules
- prepare the tax declaration according to the tax planning under the tax and insurance law to protect the benefits and assets of the company

Tax planning originated with the idea of creating a corporate structure governing all rules for investment and tax laws starting with the planning phases of a project. It became the basis for calculating new projects, to calculate prices, costs and expenses. It is the basis for evaluating the competitiveness of your project in the market. In addition to that, multinational companies must take multinational law into consideration when doing their tax planning. With proper tax planning you will avoid mistakes and guarantee the success of your project.

The income tax law no 91 of the year 2009 in Egypt obliges the taxpayer and the auditor jointly to be liable for the validity of the data provided.

The tax department has to receive the tax declaration from the taxpayer; its role is limited to audit the declaration and to ensure the payment of tax without decreasing or increasing the amount.

Companies must prepare the balance sheets according the Egyptian accounting rules and should be accurate with income and expenses to avoid any future tax difference after revision.

A correctly issued invoice has to include:

- | | | | |
|---|-------------------------------|------------------|--------------------|
| 1. Name and address | 2. Commercial type | 3. Serial number | 4. Tax file number |
| 5. Tax registration number | 6. Commercial register number | 7. Stamp | |
| 8. Signature of financial manager and the manager in charge | | | |

Taking this into account one could say that tax planning is a must for any investment, particularly if it comes to ensuring foreign investments.

Unique form... of Legal Services

Der beste Schutz für Ihre Immobilie

Der beste Schutz für Ihre Immobilie

Nach ägyptischem Gesetz gibt es 3 Wege Ihr Eigentum legal zu schützen:

- 1- Eine Registrierung durch das Grundbuchamt (Shahr Aqari)
- 2- Unterschriften Beglaubigung (auf dem Gericht)
- 3- Beglaubigung des Kaufes (auf dem Gericht und dem Grundbuchamt)

Registrierung durch das Grundbuchamt

Die wirksamste und sicherste Art ist die Registrierung durch das Grundbuchamt, jedoch haben 99% der Käufer keine Möglichkeit diese durchzuführen. Warum nicht? Nach ägyptischem Gesetz müssen das Land und sämtliche auf dem Land errichtete Gebäude auf dem Grundbuchamt registriert werden, bevor einzelne Wohnungen eingetragen werden können.

Dies ist meist nicht der Fall. Somit kommt als beste legale Lösung die ‚Beglaubigung des Kaufes‘ zum Zuge. Diese Art der Legalisierung gibt Käufern eine doppelte Sicherheit (gerichtlich und auf dem Grundbuchamt). Beglaubigung des Kaufes (auf dem Gericht und dem Grundbuchamt)

Der Antrag auf Registrierung beginnt bei Gericht, und wird dann auf dem Grundbuchamt weitergeführt, wodurch man letztendlich den sogenannten ‚Grünen Vertrag‘ erhält. Dieser bietet eine komplett legale Sicherheit für Ihren Besitz.

Mit diesem ‚Grünen Vertrag‘ ist der Käufer 100% abgesichert. Die Immobilie wird in seinem Namen auf dem Gericht und auf dem Grundbuchamt eingetragen.

Die Dauer dieses Verfahrens beträgt im Durchschnitt 5 Monate.

Наилучшая защита для вашего имущества

В соответствии с египетским законодательством существует три способа защиты вашего права собственности

- 1- Регистрация через земельный офис (Шахр Акари).
- 2- Заверение подписи (через суд).
- 3- Заверение процесса покупки (через суд и через офис регистрации земли).

Наилучшим способом является регистрация через земельный офис, но около 99% покупателей не могут зарегистрировать имущество таким способом. Почему? Потому что согласно египетскому законодательству земля и дом должны быть зарегистрированы в земельном офисе до подачи заявления на регистрацию квартиры. Фактически в Хургаде только 1% всех земель зарегистрирован таким образом.

Таким образом решением является заверение процесса покупки.

Такой способ дает покупателю двойную юридическую защиту (суд и офис регистрации земли).

Подача заявления на регистрацию должна начаться в суде, а затем в офисе регистрации земли. Итоговый результат получение «Грин контракта».

Это и будет являться полной юридической защитой собственности. Имея «ГРИН КОНТРАКТ» покупатель будет защищен на 100%. Его имущество будет записано на его имя в базе данных суда и офиса регистрации земли (Шахр Акари).

Срок оформления документов данным способом занимает около 5 месяцев.

Thai Food

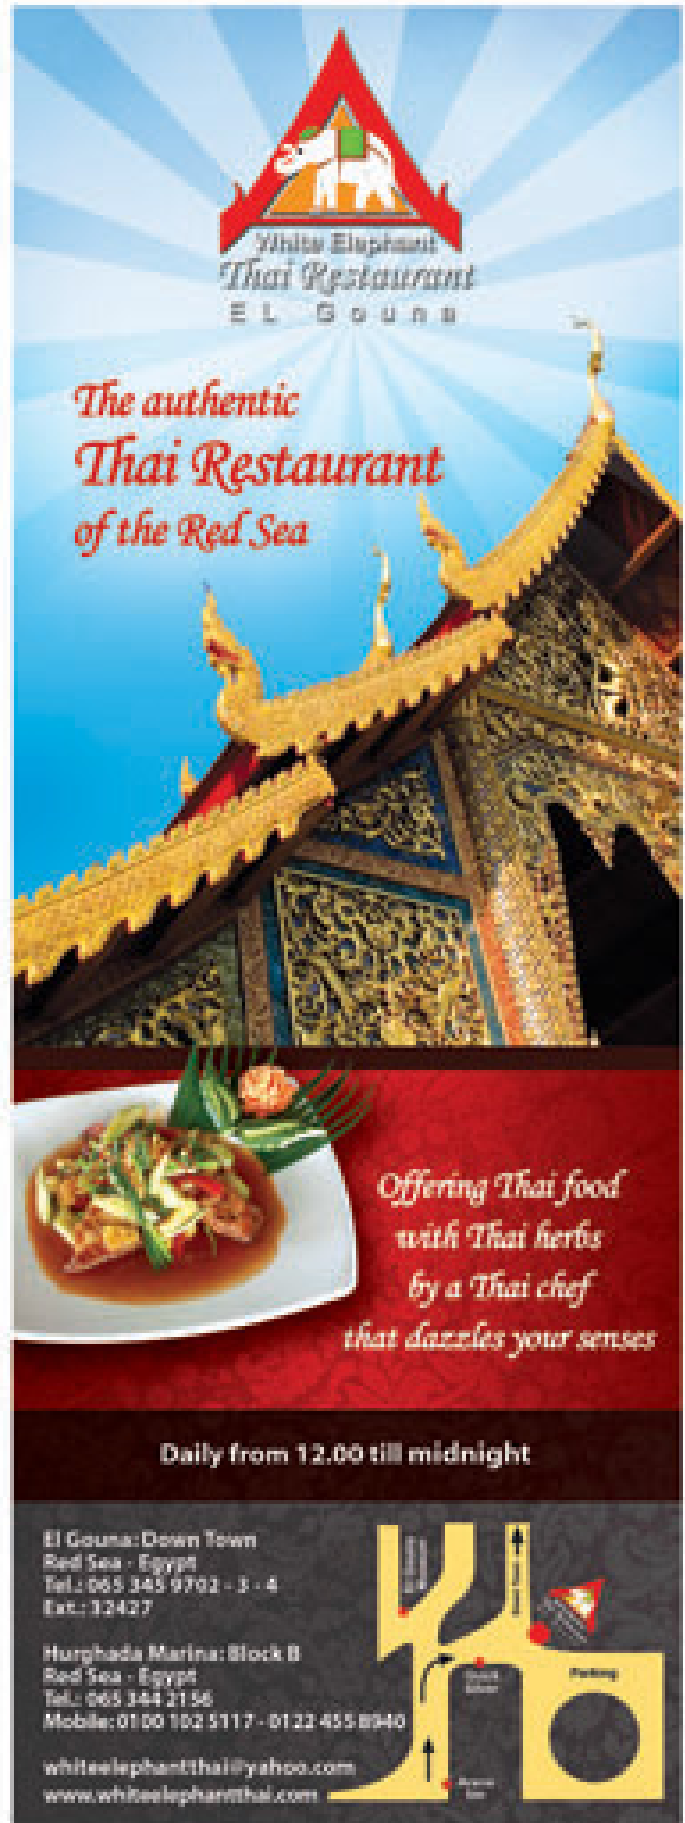

Thai food is internationally famous. Whether chili-hot or comparatively bland, harmony is the guiding principle behind each dish. Thai cuisine is essentially a marriage of centuries-old Eastern and Western influences harmoniously combined into something uniquely Thai. Characteristics of Thai food depend on who cooks it and for whom it is cooked, for what occasion and where it is cooked. Dishes can be refined and adjusted to suit all palates.

Originally, Thai cooking reflected the characteristics of a waterborne lifestyle. Aquatic animals, plant and herbs were major ingredients. Large chunks of meat were eschewed. Subsequent influences introduced the use of sizeable chunks to Thai cooking. With their Buddhist background, Thais shunned the use of large animals in big chunks. Big cuts of meat were shredded and laced with herbs and spices. Traditional Thai cooking methods were stewing and baking, or grilling. Chinese influences saw the introduction of frying, stir-frying and deep-frying.

Culinary influences from the 17th century onwards included Portuguese, Dutch, French and Japanese. Chilies were introduced to Thai cooking during the late 1600s by Portuguese missionaries who had acquired a taste for them while serving in South America. Thais were very adept at "Siamese-izing" foreign cooking methods, and substituting ingredients. The ghee used in Indian cooking was replaced by coconut oil, and coconut milk substituted for other dairy products.

Overpowering pure spices were toned down and enhanced by fresh herbs such as lemon grass and galangal (Thai ginger). Eventually, fewer and less spices were used in Thai curries, while the use of fresh herbs increased. It is generally acknowledged that Thai curries burn intensely, but briefly, whereas other curries, with strong spices, burn for longer periods. Instead of serving dishes in courses, a Thai meal is served all at once, permitting diners to enjoy complimentary combinations of different tastes.

A proper Thai meal should consist of a soup, a curry dish with condiments, a dip with accompanying fish and vegetables. A spiced salad may replace the curry dish. The soup can also be spicy, but the curry should be replaced by a non-spiced item. There must be harmony of tastes and textures within individual dishes and the entire meal.

Snorkelling Courses

FREDS SWIM ACADEMY Egypt offers Snorkelling courses for children and adults. Between having fun and enjoying their time at the beach, most people don't think much about sea safety, but they should.

"Sea Safeguard Check" for advanced swimmers:

Your personal safety should be a personal concern to yourself.

You should make every effort to ensure your own safety; this includes being able to swim, having knowledge about sea creatures and of the conditions you might be exposed to. Swimming in the sea is very different to swimming in a pool. That's why here at FRED'S we have developed a specific Sea Safeguard check designed to make sure you have the skills and knowledge required to swim safely in the sea.

Join "Dolphin Watch"

FREDS SWIM ACADEMY Egypt are supporting "Natural Underwater Science" the observation project founded by a Swiss biologist, Angela Ziltener. The project is the first of its kind. So far they have named over 120 dolphins just by recognizing the shapes of their fins, noses and other natural markings.

During the summer vacation you can join us on the boat to understand a dolphins needs and why their natural environment is so important. To join us with these agile creatures all participants are required to have passed a Sea Safeguard Check, for safety reasons.

Incredible Hulk Mohamed Salama Visiting Grand Gym & Grand Fish

Captain Mohamed Salama from Egypt became Mr. Universe World Championship Bodybuilding in 2003 in Mumbai, India; with many more titles on his name.

We had the honor to have Captain Mohamed Salama and his wife in our gyms; Grand Gym, Ladies Gym and Kids Gym. The feeling what we want to create in our gyms, they recognized it immediately: A familiar atmosphere where everything is possible for everybody.

After an orientation through our gyms, our staff had the possibility to work out with Mr. Salama. Several training sessions followed and hours were spent in our gym. He complimented our place with a beautiful view. Also our trainers couldn't escape from the many compliments he gave; the professionalism and their work spirit created such a nice feeling that he will come back soon.

After this invigorating day for him and his wife, they had a lunch in our restaurant Grand Fish. Both were crazy about the food; they visited many fish restaurants in and around Egypt, but never one like ours. They promised us to come back later to try our delicious desserts.

Captain Mohamed Salama gave us exclusive news that he will attend the World Championship of Bodybuilding at the end of this year.

Yoga is for everyone

Forget about your fitness level. Forget about your age. Let go of your pre-conceived notions of what yoga is about. Yoga is for everyone. Yoga is a non-competitive, personal and enjoyable activity that can produce truly amazing results. You start at the beginning and you continue at your own pace. Whether you are a total beginner or an advanced practitioner, the benefits of yoga are many. With commitment, time and effort, yoga can change you as much or as little as you desire.

Yoga means "union" - the union of mind, body and spirit.

Yoga is a magical fitness program that helps balance emotion, sharpen the intellect, and bring peace of mind. The attention to physical body with emphasis on the postures is what makes yoga so popular in our culture. You do not have to be spiritual to practice yoga. Start with the physical exercises - the postures - and see where they lead you. If you make the choice to practice regularly, not only will your body become more flexible, so will your mind. As we open our minds to the philosophy of yoga, we become open to life's possibilities. We learn to let go of the past and leave the baggage behind. Resistance will then break down so that new energy can flow into the empty spaces. Ultimately, with a little patience, discipline and practice, you will find yourself changing.

We have our yoga classes split into several groups, which means that you will find a suitable class for you whether you are a beginner or advanced yoga practitioner.

WHERE TO GO

Hurghada

HURGHADA (AL GHARDAKA)

Hurghada is located 22km south of El Gouna and 54km north of Safage, with the Red Sea to the east and the mountains of the Eastern Desert to the west. Two decades ago Hurghada was a modest little fishing village and is now home to about 248,000 people. Most of them are working in services for the more than 4 million sun-seekers and diving enthusiasts visiting the area every year. Crystal clear, calm waters and fascinating coral reefs have made Hurghada, or Al Ghardaka, as the Egyptians call it, Egypt's most popular resort town with more than 250 hotels in all categories. Hurghada is divided into three parts: El Dahar (downtown) is the old part; Sakala is the city center and El Mamsha (pedestrian area) is the modern part. In all three areas you can find plenty of bazaars, shops, restaurants, bars, discotheques, fruit and vegetable markets, as well as the post office, telephone central, banks and money exchange offices and more...

Ask your tour leader for more information and have a look at the following pages "Where 2 Go?" to find out more about what Hurghada has to offer.

Hurghada liegt 22 km südlich von El Gouna und 54 km nördlich von Safage. Östlich der Stadt liegt das Rote Meer und westlich erstrecken sich die Bergketten der Ostwüste. Vor zwei Jahrzehnten war Hurghada ein bescheidenes kleines Fischerdorf und ist jetzt Heimat von etwa 248000 Einwohnern. Die meisten von ihnen arbeiten im Tourismusgeschäft für die über 4 Million Sonnenanbeter und Tauchbegeisterte, die jedes Jahr zu Besuch kommen. Kristallklares, ruhiges Wasser und faszinierende Korallenriffe haben Hurghada mit seinen über 250 Hotels zum meistbe-

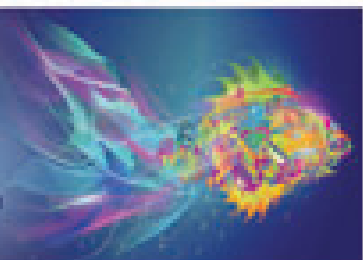

suchten Resort am Roten Meer gemacht. Hurghada ist in drei Teile gegliedert: El Dahar (Downtown) ist der alte Teil, Sakala ist die Innenstadt und El Mamsha (Fußgängerzone) ist der moderne Teil. In allen drei Stadtteilen finden Sie viele Basare, Geschäfte, Restaurants, Bars, Discotheken, Früchte- und Gemüsemärkte sowie Post, Telefonzentrale, Banken, Wechselstuben und vieles mehr. Fragen Sie Ihren Reiseleiter nach Detailsinformationen und erfahren Sie im folgenden Teil "Where 2 go?" mehr über Hurghada.

Хургада расположена в 22 км к югу от Эль Гуны и в 54 км к северу от Сафаги, на побережье Красного моря. Два десятилетия назад Хургада была скромной небольшой рыбацкой деревней, а теперь является «домом» для более чем 248 тысяч человек. Большинство из них работает в сфере обслуживания, поскольку больше 4 миллионов жаждущих солнца и погружающихся в пучину вод туристов, посещают этот город ежегодно. Кристально чистые и спокойные воды и живописные коралловые рифы сделали Хургаду одним из самых популярных курортов на Красном море. Более 250 гостиниц выросло вдоль побережья за эти годы. Хургаду можно условно поделить на три района: старая часть города называется Эль Дахар (dawn town), Sakala, (Сакала) - это молодой "новый центр" Хургады. Огромный пешеходный бульвар Эль Мамша - наиболее молодая и современная часть, ориентированная на туристов. Повсюду Вы можете найти множество базаров, магазинов, ресторанов, баров, дискотек, есть рынок, почтовое отделение, между-народный телефон, банки, пункты обмена валюты и т.д.. В разделе «Куда пойти», а также у своего гида Вы можете получить дополнительную информацию о том, что Вас интересует.

Гостеприимные хозяева Карло и Федерико (приветствия во всех отношениях гурман) привезли с собой в Хургаду «кусочек Италии», её полновесный вкус и стиль. Много также включает холодные закуски: салаты, bresaola с рукмой и пармезаном, сэндвич с различными наполнителями, bruschetta и "Tangier di Salumi" – как итальянский закусочный. А ещё вас удивит: моцарелла – на основе молока коровы или буйволицы; рикотта по-домашнему, маскарпоне и саморза.

Все можно заказать на вынос. Различные виды пасты и соусов домашнего приготовления. Заказав на вынос – легко приготовить всей семьей. Barracuda Seafood Restaurant & Café

The newly opened restaurant has already proven its consistent quality of always fresh fish and seafood. Items are displayed on ice for your choice at the entrance to the large and fully air-conditioned dining hall. Here you can even find fresh lobsters, such as the slipper lobster, a delicacy you can find in the Red Sea.

Barracuda features also a modern café attached to the seafood restaurant with a separate entrance. It is always nice after a seafood lunch or dinner to change from your dining table to the comfortable seating of the café and watch music clips or sport events on the big TV screens. Try the fresh juices, have a tea or coffee and enjoy a water pipe with your favorite tobacco.

The decoration of the entire venue is really special, a place you must see and experience the taste of quality fish and seafood. Great food and drinks for moderate prices!

Das im Mai neu eröffnete Restaurant beweist sich durch seine konstante Qualität von Fisch und Meerestrimchten, die zu ihrer Auswahl direkt beim Eingang zum voll klimatisierten Restaurant auf Eis präsentiert werden. Hier bekommen Sie sogar Bärenkrebse, eine besondere Art von Lobster, die sich vorwiegend von Muscheln und Krustentieren ernährt, eine echte Delikatesse aus dem Roten Meer. Ein Teil von Barracuda ist als Café gestaltet und hat einen separaten Eingang. Nach einem ausgiebigen Fischessen wechselt man gerne vom Restaurant ins Café, erfrischt sich an den köstlichen Fruchtsäften oder genießt seinen Tee oder Kaffee mit einer ägyptischen Wasserpfeife, die hier im klimatisierten Café serviert wird.

Die Dekoration von Barracuda ist einzigartig, die Qualität der Speisen und Getränke ist hervorragend und Preise sind moderat. Barracuda ist einen Besuch wert!

Совсем недавно открывшийся (в мае 2012г.), но уже успевший хорошо зарекомендовать себя ресторан. Высокое качество и широкий ассортимент свежей рыбы и морепродуктов. У входа в просторный полностью кондиционированный и оригинально декорированный зал можно сделать свой выбор для трапезы (включая лобстера или даже «слепого лобстера» - это особый деликатес на Красном море).

Современная кафешка с телевизором, ТВ экраном, диванчиком и уютными удобными диванчиками привлекает к просторному залу, но также имеет и отдельный вход через открытую террасу, где можно приятно скоротать время и расслабиться с чашечкой кофе или бокалом коктейля из свежих соков. Сочетание умеренных цен и высокого стандартов делает место весьма привлекательным!

Africa-Europe Challenge

Africa-Europe Challenge (AEC) was created by two Hungarian gentlemen, Mr. József Gál and Dr. Péter Kondrác 4 years ago, who act as the project directors. The idea was to leave the conventional ways of establishing relationships between Europe and Africa and to create a new form of cooperation, based on equality of the involved parties and respecting their economic, political and cultural interests.

The intention is that the AEC project will have significant impact on the relation between Africa and Europe, realized through a series of long-term events!

Main units of long-term events:

1. Promotional year (April 2012 - May 2013)
2. The First Africa-Europe Challenge (25 May 2013 - 25 May 2014)
3. Organizing further AEC events in every 3 years (2016... 2019...)

Africa-Europe Challenge Promotional Year 2012-2013

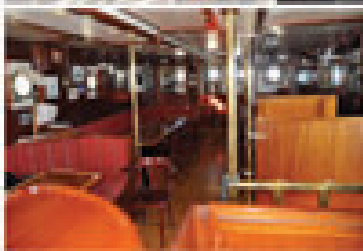

Before starting their 'Promotional Year' AEC organized and took part in countless events, such as the presentation of the project the EU presidential conference (Spanish-Belgian-Hungarian) in Budapest in July 2009, several business forums throughout Europe and Africa, presentations at embassies and negotiations with companies and business chambers. Promotional events will go on for the duration of the project to increase the awareness of the private and business sector. As the AEC project is supported by the Hungarian Ministry of Foreign Affairs; most of the events will be held in the Hungarian Embassies in presence of the ambassadors of Hungary.

Promotional presence in Africa

To promote the Africa-Europe Challenge in Africa, the flagship of the AEC, the Dutch ASTRID tall ship had set her sail from Malta on Africa Day (25 May 2012) to circumnavigate Africa and visit the countries (where the AEC fleet will stop the year after) in order to invite those countries to participate in the AEC. Five out of the fifteen stops will host Africa-Europe Business Forum series events (Egypt, South-Africa, Nigeria, Canary Islands, and Morocco).

Astrid, built in 1918 in Scheveningen, the Netherlands, was built as a cargo ship, and traded in the Baltic until the mid seventies. A period under the Lebanese flag followed, until a fire destroyed the ship and she was found off the English coast in 1984. Her strong hull survived, and she was saved by two British ex naval officers, who used her as a sail training ship for young people. She was given her imposing rig and made Atlantic crossings. Since 1998 Astrid was back in her native Holland and she has been fully restored and equipped as a luxury sailing ship; now she is circumnavigating Africa!

Red Sea Bulletin had the chance to visit the tall ship ASTRID on the 20th and 21st of June and to meet the team of AEC in Hurghada where they stopped over after visiting Alexandria and El Gouna. Barbara and Thomas Bordenhn hosted representatives of the governorate and the AEC representatives with entire crew in their 'flagship', the restaurant B's in the Hurghada Marina.

The official part of the evening was held under the auspices of the Red Sea Governorate, represented by Secretary-General Saad Amin. Mr. Maher Abou El Nouf, manager of Hurghada Marina, welcomed the guests and spoke a few words about the marina. Mr. Ahmed Galal, representing AEC, and Diana Takács, Senior Coordinator, gave an overview of the Africa-Europe Challenge project, and told us about their experience in Egypt. They enjoyed their stay here very much and decided to also stop over in Soma Bay and Port Ghalib. The evening ended with General Saad Amin giving presents to the guests.

We wish the sailors good luck on their trip around Africa, and success for the Africa-Europe Challenge!

Своим названием ресторан обязан популярной итальянской киноленте 60-ых «Сладкая жизнь». И не случайно! Владелец ресторана господин Мохсен Афифи живет между Италией и Египтом уже около 30 лет. Живя в перекрестке великого «сладкой жизни» из Италии на Египетское побережье стало одной из причин создания «сладкой Dolce Vita». Особую привлекательность имеет уникальное расположение ресторана на побережье Красного моря в резиденции "The View" на двух уровнях, что даёт уникальную возможность насладиться не только удивительным видом, но также и восхитительным видом на море с удивительной отличной биркой, переключаясь в лучах восходящего (или наоборот) солнца. Итальянский шеф-повар приготовит для Вас завтрак, обед или ужин в уютной обстановке итальянского стиля. «Паста» по-домашнему, настоящая пицца, свежая рыба, жареные стейки, тахини во рту Тiramisu, и много других соблазнительных кулинарных шедевров в меню этого ресторана. Wi-Fi, аркадный кабинет, вечеринки с живой музыкой, ночные открытой террасы, умеренные цены, специальные предложения, – всё это в одном месте и на любой вкус! Ресторан работает круглосуточно! Ах, эта «Сладкая жизнь»!

Это уже как торговая марка добротной высококлассной пищи в Хургаде. Под одной крышей собрались BULLS STEAK HOUSE, ПИЦЦЕРИЯ, а также ЕВРОПЕЙСКАЯ БУЛОЧНАЯ. «Стойк хаус Буллз» особенно славится своими мясными блюдами, как антрекот, стейк филе, а также разнообразным салат-баром.

The "Pizzeria" как для туристов, так и для местных жителей наилучшая в Хургаде. Шеф-повар действительно хорошо знает своё дело! Особенно хотелось бы отметить приготовленные по-домашнему макаронные изделия (настоящая паста!) самых различных вариантов. Салаты. А на десерт – настоящее лакомство – Тирамису! Настоящий итальянский кофе-эспрессо или кофе-латте (т.е. с молоком!)

В Европейскую булочную частенько навещают многие работающие в Хургаде иностранцы. И есть замеч свежеприготовленный ржаной хлеб, батоны белого, а также множество различных пирожков, тортиков, недорогих сладостей...

Crocodile Museum

Open in Kom Ombo

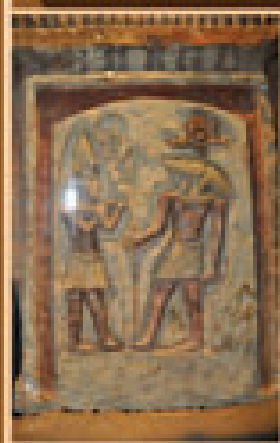

Egypt's first museum devoted exclusively to crocodiles was open in March 2012. The crocodile museum was the third museum to be inaugurated in Egypt recently, after the Imhotep Museum at the Saggara Necropolis and the Hehsephah Museum on Luxor's west bank. The concise exhibition opened just after almost three years of construction and is currently included on the Kom Ombo Temple entrance ticket (30LE/5USD).

The museum is located on the doorstep of the Ptolemaic Kom Ombo temple on the banks of the Upper Egyptian city of Assua. It displays 22 mummified crocodiles of various sizes out of the 40 that have been unearthed in Assua. The crocodiles are arrayed on a sand hill inside a large glass showcase, allowing visitors to see how crocodiles passed their days in ancient Egypt.

A collection of crocodile coffins and wooden sarcophagi, along with crocodile fetuses and eggs, are also on display, in addition to stelae and statues depicting the crocodile-god Sobek, bearing a human body and the head of a crocodile. Replicas of Sobek's original tombs and niches are also on display.

The most significant artifacts currently on display are the gold and ivory teeth and eyes that had been inserted into the dead crocodiles following mummification.

The ancient Egyptians believed that gods sent physical manifestations of themselves to earth in the form of their totemic animals. Thus, at the Temple of Kom Ombo a live crocodile was thought to contain a spark of the god within and was worshipped and cared for by the priests during its lifetime. After its death, the spirit of the god would move to another crocodile's body, while the dead crocodile would be mummified and ceremoniously buried in a special cemetery. Pilgrims who came to pray to Sobek (the crocodile-headed god, of which half of the Temple of Kom Ombo is devoted to) would also give votive offerings in the form of small mummified crocodiles or statues to the god and these would also be buried in the cemeteries.

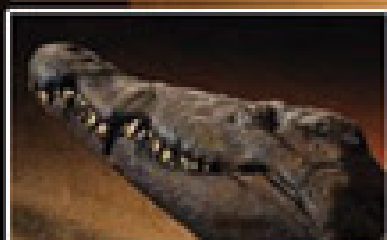

Sobek was depicted in Egyptian art either as an ordinary crocodile, or as a man with the head of a crocodile. He was also patron of the pharaoh's army and was shown with the symbol of royal authority. The ashi he held represented his ability to undo evil and thus cure ills. Once he had become Sobek-Re, he was also shown with a sun-disc over his head. In other myths Sobek was credited with catching the four sons of Horus in his net as they emerged from the waters of the Nile in a lotus blossom.

Kom Ombo, in ancient times, was an important crossroads on the caravan routes from Nubia and from the gold mines in the Eastern Desert. The Kom Ombo temple was built during the reign of the Ptolemaic pharaoh Ptolemy VI, and was dedicated to the worship two deities. The southern half was dedicated to Sobek, god of fertility and procreator of Hadhor and Khoosu, while the northern half was dedicated to the falcon god Horus. Some subsequent additions were made up to the Roman era, most notably was by Ptolemy XIII who built the inner and outer hypostyle halls. Much of the temple has since been destroyed by Nile floods, earthquakes and builders who used its stones to construct other temples and sanctuaries.

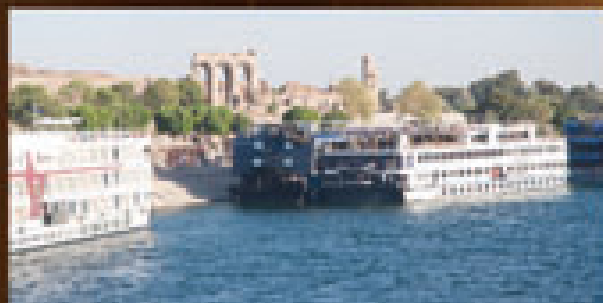

Музей крокодилов открыт в Ком Омбо

В марте 2012 г торжественно открылся первый в Египте Музей посвященный крокодилам, расположенный перед храмом Себеку и Гору в Ком Омбо (район Асуан). В древности на этом месте располагался город Па-Себек – «Дом Себека». Строительство музея и создание экспозиции заняло почти три года. Посещение музея входит в стоимость входного билета в храм и составляет для туристов 30 египетских фунтов (около 5 USD).

Из сорока мумий крокодилов разных размеров, найденных в Ком Омбо, в музее выставлены двадцать две. Экспонаты расположены на песчаном холме внутри большой стеклянной витрины, позволяя посетителям лучше понять, как рептилии проводили свои дни в Древнем Египте.

Большая часть коллекции музея хранилась в Ком Омбо, за исключением двух stel и статуй Себека, позаимствованных в Луксорском музее. По словам министра, наиболее значимые из выставленных объектов – это зубы и глаза из золота и слоновой кости, которые вставлялись в уже готовые мумии крокодилов после бальзамирования. Музей крокодилов стал третьим в списке недавно открытых, после Музея Имхотепа в Сахаре и Музея Мернептаха на западном берегу Луксора. Себек был очень почитаем в Древнем Египте, особенно в Ком Омбо, где в его честь был построен огромный храм. После смерти со священным крокодилом обращались, как с божеством – его тело мумифицировали и хоронили, как фараона, не скупясь на погребальные приношения.

Parrotfishes

(Scaridae)

Рыба – попугай

(Семейство Скардовые)

Рыба-попугай получила своё название из-за яркой окраски и зубов, соединяющихся наподобие клюва. Большинство видов питается тонким слоем водорослей, покрывающих кораллы, соскабливая их с характерным звуком. Рыбам переваривается лишь вегетативная часть пищи, а кальцийсодержащая субстанция перемалывается и выделяется в виде мельчайшего кораллового песка. Это типично дневные рыбы, они держатся поодиночке или небольшими стаями. Ночью рыбы прячутся в расщелинах рифа или среди каменных кораллов. Некоторые виды способны выделить слизь, в которую они прячутся на ночь, как в кокон. Эта уловка, похоже, используется рыбами для защиты от ночных хищников, таких, например, как мурена, которые не могут учуять добычу, покрытую желатиновой плёнкой.

Скардовые напоминают по форме кистиль, у них крупная и круглая чешуя. Характерны пестрые оттенки - от красно-коричневого до цвета морской волны, розового, красного, синего, зелёного. Как правило пёструю окраску имеет моводь и самки, самцы - более «солёдную» окраску.

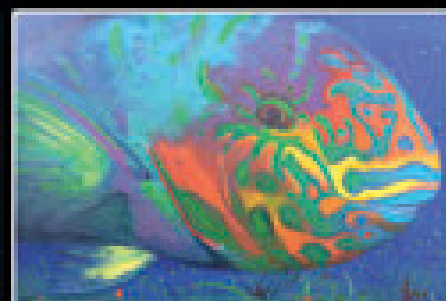

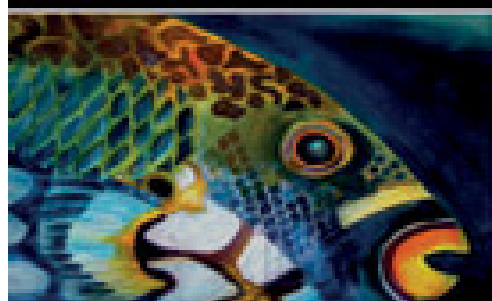

Скардовые являются гермафродитами, изменяющими свой пол с женского на мужской, во время изменения пола - меняется и окраска. Из личинок выклевываются самки, которые на определённом этапе жизни (после нереста) превращаются в самцов. Имеются некоторые особи, которые всю жизнь являются самцами. У многих скардовых - стайный нерест, но есть и парное размножение: самец сопровождает самку в поверхности воды, где они выметывают икринки и молоки.

This family was appropriately named after the brilliant colors of its members and the fused, plate-like teeth that form a beak-like structure. These features yield a distinct parrot-like appearance. Parrotfish are elongated, spindle shaped fish with large cycloid scales. The color range is wide, from a uniform reddish brown to brilliant composition of turquoise, pink, red, blue and green. Commonly, the males have the more intense coloration. The parrotfish are hermaphrodites that change sex from females into male. During this sex change, the body coloration is modified to suit the new gender. However, a certain percentage of males are born as primary males and don't change their sex.

Parrotfish are diurnally active, commonly seen to cruise the reef in schools. At twilight, the schools break up and each parrot finds a night-time shelter, typically on the reef table. As it sets in to retire for the night, it secretes a thick coating of mucus in which it lies enshrouded throughout the night. This coating is thought to help in defending against parasites and predators. Parrotfish are vegetarian that feed mainly on algae that cover the rock and corals of the reef. They easily break off with their strong teeth pieces of rock or coral, digest the organic matter and excrete the inorganic remnants in the form of a fine dust. This phenomenon has great ecological significance, and parrotfishes are among the most important sediment producers on the reef.

Some parrotfish practice group spawning. Others spawn in pairs, with the colorful male gripping the female and rising with her to the water surface, while releasing the eggs and sperm. The fertilized eggs are planktonic and are dispersed with the currents.

Marsa Alam

Marsa Alam is a small but important city. It is located 130 km South of El Guseir and 270 km South of Hurghoda. Edfu at the Nile valley lays 220 km to the West. Marsa Alam has about 6000 inhabitants. They are fishermen, raise sheep, goats and camels, or work in mining, cutting Marble, Granite and Feldspar stone. Mining here is done since ancient times. To pharaonic and later Roman Egypt the desert around Marsa Alam was known for its resources of gold, emeralds and semi-precious stones. The rise of tourism in the area provides additional jobs for the residents.

The local people are originally represented by two tribes, the Al Ba Abda and the Al Bosharya. They lived in the Eastern Desert for a long time and already the ancient Egyptians used them to protect Egypt's eastern borders. Later these tribes mixed with the Arabs who brought the Islam. The Al Ba Abda speak Arabic, but have – like Al Bosharya – a private language called Tebdawi or Badawit. This language is only spoken and does not exist in writing.

Looking after goats, sheep and camels are their main work, and they are well known for making coal by carbonizing the wood of the dead old trees. They are good hunters as well. Their huts are called Khisha and are usually built on higher levels not to be flooded if it should rain. It is the responsibility of the women to build them from tree branches and to cover them with branches of palm trees.

Now the government started to build houses for the Bedouins. Services such as hospitals, medical centers and schools have been made available.

Marsa Alam sits on the T-junction between the Red Sea coast road and the road to Edfu. This road, probably built by PTOLEMY II in the Greek period, passes through many historic

places like Wadi BARANIYA, where the ancient Egyptians mined much of their gold, or Wadi MIYA, where a temple was built by SETI I among others. Many rock inscriptions from pre-pharaonic times were found near Marsa Alam. The ancient graffiti depicts animals like giraffes, cattle and hunting scenes.

The fantastic sandy beaches with their lagoons of turquoise coloured water and virgin reefs provide perfect conditions for all kind of water activities. Marsa Alam is famous for diving and was lately discovered by kite surfers for its excellent wind conditions. Diving sites like Elphinstone reef, Dolphin house, Fury shoals, Zabargad or Daedalus attract divers from all over the world.

The surrounding desert is untouched by tourism. Besides its natural beauty it has many archaeological sites that can be visited by different desert safari companies. Wadi El Jimal, one of the most beautiful National Parks in Egypt, is located South of Marsa Alam. There is much wild life and a lot of historic sites dating from Ptolemaic and Roman times. Many tourist villages and fancy luxurious hotels were built along the coast of Marsa Alam. Iberotel Coraya Beach Resort, Abu Nawas Resort, Kahramana Resort, Cataract Resort, Al Zabargad, Sol Y Mar and the Ecolodges Marsa Shagara, Marsa Nakari, Wadi Lahami and Bedouin Valley are just some of them. Since Marsa Alam has its own international airport, tourists can lately take a direct flight from many European countries.

Many investors from all over the world are now looking towards Marsa Alam area as one of the most potential tourist destinations.

Ancient Egyptian Celebrations

The ancient Egyptians loved celebrations. Egyptians made calendars to record the dates of birthdays, festivals, feasts, and holidays. Many of these calendars were inscribed on the walls of many temples. The calendars were also written in scrolls and in temple archives. Festival calendars list the details of some of the celebrations, such as the date and what the celebration is for and what it is about.

In ancient Egypt many of the celebrations were civil celebrations. We know that annual celebrations were established by **Ramses III** to celebrate and honor his victory over the Libyans who had invaded Egypt unsuccessfully. Another occasion was the coronation of kings, the date of which was frequently included in the religious calendar.

Some festival days were more important than others: New Year's Day, Feast of Wagy, Feast of Anket, and Feast of Thuthi. New Year's Day in Egypt was known as Wep-ropet. The first celebration was the New Year's festival. For the ancient Egyptians New Year's Day wasn't just the first day of the year, it was also the day rejuvenation and rebirth took place. Seventeen days after New Year's Day there was a feast of Wagy. It soon became connected to the festival of Thoth on the nineteenth day of the year. This celebration is from the 4th dynasty, making it one of the oldest festivals in ancient Egypt. The Festival of Anket was to celebrate the rising of the Nile River. The Nile was very important to the Egyptians; the river gave the ancient Egyptians many things. Thuthi is the festival of the dead and was celebrated at sunset. This festival was celebrated because the ancient Egyptians believed that the afterlife was highly important. - By Julie F.

"Father and Son" Skyscraper

Architects: IAMZ Studio

Lead Architect: Ahmed El Seyoufi

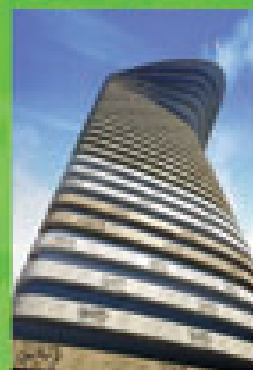

Area: 8000 m²

Project Elements: Administration, Residential, Tourist area, Cultural district, Media zone, Recreational area, A part for public services, Small medical zone "for emergency"

The unique project **Father and Son** skyscraper (470m high) was designed by **IAMZ Studio** for Cairo.

The place for this project is located near the airport from the north front of river Digma Valley which is a main tourist attraction and can in turn attract visitors to the hotel from the valley. It's obvious from the mixture of the two architectural methods that the Islamic architecture is rotating in a counterclockwise direction while the modern architecture is rotating in a clockwise direction.

The main reason for the skyscraper typology is to decrease the crowding in the capital Cairo.

The central shape is taken from the relationship between Father and son shapes based off of the Wadi Degla rock shapes in order to create a relationship between design and nature.

With a height of **470 meters**, this urban design marks a sign of growth in the city of Cairo.

There is a mixture between the modern and Islamic architecture shown in the style of the building. In regard to green roofs and green areas, planting green areas in the design was intended to increase the refreshment of air

The Vision: **SENZO City**

SENZO Mall opened in August 2009 as the biggest shopping mall in the Red Sea, just minutes from downtown and the airport of Hurghada. It occupies a territory of 70000 m² of the total plot with 175000 m², big enough to realize the ambitious future plans of its owners.

The experience of shopping has carefully been mixed in an enjoyable way to make SENZO the best choice for shopping in the city of Hurghada ever. It includes the largest hypermarket in the Red Sea area (Spinney's) with an area of about 8000 m² in addition to wonderful famous chains of brands, shops and agencies in various fields covering all needs of shopping and entertainment aspects, providing the mall with all shopping needs. Including a variety of recreational activities such as cinemas (including a new 5D cinema) and entertainment complexes for children, restaurants, international café shops and all other recreational activities operated by specialized international companies. Also many concerts and exhibitions take place in the mall in various events throughout the year, making SENZO Mall the first recreational center in Hurghada and the Red Sea area.

SENZO Mall also offers a Shuttle Bus service covering most of Hurghada city available for residents and tourists, making the trip to SENZO Mall easy and enjoyable.

NEW: SENZO Plaza opening for Ramadan

The Plaza will make SENZO Mall even more interesting for residents and tourists, an integrated location in all aspects comparable with the latest world malls. You will love to spend your free time there with 8 new outlets, including cafés, restaurants, and big screens.

The Plaza has a stunning design and is built around a fountain with a lighted glass Obelisk, Hatshepsut could not do better!

In October 2013 the new SENZO Sporting Club will open in a dimension we could not think possible here in Hurghada: football fields, swimming pools, tennis courts, basketball, volleyball, squash... just name it, everything will be there! Reserve your membership now for very special rates!

SOON: Good news for the kids! SENZO will open a new 'Fun City' on 4000 m², bringing the latest games to Hurghada.

What's next? We hear that SENZO will develop into a real city with international schools, hospitals, medical center and a residential area.

It is refreshing to see how entrepreneurs invest in Egypt even in this volatile market. We wish them all the best on their way helping to develop Hurghada into an international city.
