## EGYPT'S FIRST SOLAR CELL POWER PLANT TO BE BUILT IN HURGHADA

In a spot of energetic news, Egypt's New and Renewable Energy Authority (NREA) has just signed a soft loan agreement with the Japan International Cooperation Agency (JICA) worth JPY 11.3 billion (a bit over \$106 million or EGP 1.87 billion) to set up the country's very first photo-voltaic power plant; storing upwards of 20 Megawatts of solar energy. The plant will be situated in Hurghada, and will utilize an array of batteries to store accrued energy, to be used during peak hours as well as to supply the national energy network during the night.

According to the Executive President of the NREA, Mohammed al-Khatay, the project is the very first of its kind to be established in Egypt. Furthermore, a completely Eco-friendly information center, relying completely on renewable energy from the plant, will be constructed in conjunction with the plant. Containing a litany of high-tech equipment and accouterments, the center will serve as an educational or training center for future workers in the field of renewable energy, for both the private and public sectors. The center will also contain a spacious conference hall capable of holding up to 120 guests.

As it stands, the NREA is in the process of selecting a suitable contractor to carry out the project through public tender processes which should finalize the contracting in September of this year. The plant will be capable of producing around 32 gig watts once it sees activation mid-2019, saving an oil equivalent of about 7,000 tonnes, and limiting carbon dioxide emissions by nearly 17,000 tonnes.

# Chinese Chi-Gong Therapy

## Китайская Цигун Терапия

English version will be published in the next issue,  
find it on the web: [www.redseapages.com](http://www.redseapages.com) & Facebook: @chinasport

Цигун – это искусство укрепления здоровья, практикуемое в Китае. Оно играет активную роль в предупреждении и лечении болезней, сохранении и укреплении здоровья, сопротивлении преждевременной старости и продлении жизни

Методы Цигун упражнений разнообразны в различных школах. В Китае их примерно пять: Даосская, Буддистская, Конфуцианская, Медицинская и Боксерская...

Для Медицинской школы основная цель состоит в выполнении упражнений для лечения болезней, укрепления здоровья и продления жизни.

Человеческий организм имеет специальную систему, которая соединяет поверхность тела с внутренними органами, верхнюю часть тела с нижней, а также связывает все твёрдые и полые органы. Меридианы и коллатерали охватывают все тело и приводят его в органическое единство путем соединения его различных частей. Имеется **12** регулярных меридианов, ведущих к плотным и полым органам. Помимо этих магистральных маршрутов жизненной энергии (внутренней Ци) имеется еще **8** других важных меридианов. Эти восемь меридианов не связанных прямо с внутренними органами. Они имеют специальные необычные пути, поэтому называются экстраординарными или чудесными.

Когда жизненная энергия Ци течет по меридианам в избыточном количестве, то происходит ее сброс в восемь чудесных каналов для хранения. Когда внутренней Ци недостаточно в регулярных меридианах, запасенная в чудесных каналах, она возвращается обратно в меридианы. Эти двенадцать меридианов подобны рекам и каналам, а восемь чудесных – подобны озерам.

Любая закупорка в меридианах в Китайской традиционной медицине описывается как "засорение, возникающее раньше боли". Когда меридианы и коллатерали в теле засорены, человек заболевает. Лекарства, акупрессура и массаж являются терапией, применяемой как внешняя сила для очищения меридианов и коллатералей. Самоуправляемая Цигун-терапия используется для очищения меридианов и коллатералей, используя только собственные резервы организма в излечении болезней.

Занятия по оздоровительной гимнастике с изучением китайского комплекса «Парящий журавль» проходят по понедельникам, средам и пятницам с 11.00. Пробное занятие бесплатно. Предварительная запись по телефону; +20122 7893990. (Подробнее см. Китайская гимнастика для здоровья и долголетия на стр.20 и на стр. 10 - Chi-Gong for Eyes)

## White Elephant Thai Restaurant represents Thai Cuisine Vol. 2

Thai cuisine is more accurately described as four regional cuisines corresponding to the four main regions of the country: Northern, Northeastern (or Isan), Central, and Southern, each cuisine sharing similar foods or foods derived from those of neighboring countries and regions: Burma to the northwest, the Chinese province of Yunnan and Laos to the north, Vietnam and Cambodia to the east, Indonesia and Malaysia to the south of Thailand.

In addition to these four regional cuisines, there is also the Thai Royal Cuisine which can trace its history back to the cosmopolitan palace cuisine of the Ayutthaya kingdom (1351–1767 CE). refinement, cooking techniques and use of ingredients were of great influence to the cuisine of the Central Thai

plains Western influences from the 17th century CE onwards have also led to dishes such as foie thong and sangkhaya.

Thai cuisine and the culinary traditions and cuisines of Thailand's neighbors have mutually influenced one another over the course of many centuries.

Regional variations tend to correlate to neighboring states (often sharing the same cultural background and ethnicity on both sides of the border) as well as climate and geography.

Southern Thai curry tend to contain coconut milk and fresh turmeric, while northeastern dishes often include lime juice. The cuisine of Northeastern (or Isan) Thailand is similar to southern Lao cuisine whereas northern Thai cuisine shares many dishes with northern Lao

cuisine and the cuisine of Shan state in Burma.

Many popular dishes eaten in Thailand were originally Chinese dishes which were introduced to Thailand mainly by the Teochew people who make up the majority of the Thai Chinese. Such dishes include chok

(rice porridge), kua-tiao rat na (fried rice-noodles) and khao kha mu (stewed pork with rice). The Chinese also introduced the use of a wok for cooking, the technique of deep-frying and stir-frying dishes, and noodles, oyster sauce and soybean products. Dishes such as kaeng kari (yellow curry) and kaeng matsaman (massaman curry) are Thai adaptations of dishes originating in the cuisine of India and the cuisine of Persia.

Where 2 go

Hurghada

## Hurghada - الفردقة

Hurghada is located 22 km south of El Gouna and 54 km north of Safaga, with the Red Sea to the east and the mountains of the Eastern Desert to the west. Two decades ago Hurghada was a modest little fishing village and is now home to about 248,000 people. Most of them are working in services for the more than 4 million sun-seekers and diving enthusiasts visiting the area every year. Crystal clear, calm waters and fascinating coral reefs have made Hurghada, or Al Ghardaka, as the Egyptians call it, Egypt's most popular resort town with more than 250 hotels in all categories. Hurghada is divided into three parts: El Dahar (downtown) is the old part; Sakala is the city center and El Mamsha (pedestrian area) is the modern part. In all three areas you can find plenty of bazaars, shops, restaurants, bars, discotheques, fruit and vegetable markets, as well as the post office, telephone central, banks and money exchange offices and more...

Ask your tour leader for more information and have a look at the following pages "Where 2 Go?" to find out more about what Hurghada has to offer.

Hurghada liegt 22 km südlich von El Gouna und 54 km nördlich von Safaga. Östlich der Stadt liegt das Rote Meer und westlich erstrecken sich die Bergketten der Ostwüste. Vor zwei Jahrzehnten war Hurghada ein bescheidenes kleines Fischerdorf und ist jetzt Heimat von etwa 248000 Einwohnern. Die meisten von ihnen arbeiten im Tourismusgeschäft für die über 4 Million Sonnenanbeter und Tauchbegeisterte, die jedes Jahr zu Besuch kommen. Kristallklares, ruhiges Wasser und faszinierende Korallenriffe haben Hurghada mit seinen über 250 Hotels zum

meistbesuchten Resort am Roten Meer gemacht. Hurghada ist in drei Teile gegliedert: El Dahar (Downtown) ist der alte Teil, Sakala ist die Innenstadt und El Mamsha (Fußgängerzone) ist der moderne Teil. In allen drei Stadtteilen finden Sie viele Basare, Geschäfte, Restaurants, Bars, Discotheken, Früchte- und Gemüsemärkte sowie Post, Telefonzentrale, Banken, Wechselstuben und vieles mehr. Fragen Sie Ihren Reiseleiter nach Detailinformationen und erfahren Sie im folgenden Teil "Where 2 go?" mehr über Hurghada.

Хургада расположена в 22 км к югу от Эль Гуны и в 54 км к северу от Сафаги, на побережье Красного моря. Два десятилетия назад Хургада была скромной небольшой рыбацкой деревней, а теперь является «домом» для более чем 248 тысяч человек. Большинство из них работает в сфере обслуживания, поскольку больше 4 миллионов жаждущих солнца и погружающихся в пучину вод туристов, посещающих этот город ежегодно. Кристально чистые и спокойные воды и живописные коралловые рифы сделали Хургаду одним из самых популярных курортов на Красном море. Более 250 гостиниц выросло вдоль побережья за эти годы. Хургаду можно условно поделить на три района: старая часть города называется Эль Дахар (Даун таун). Sakala, (Сакала) - это молодой "новый центр" Хургады. Огромный пешеходный бульвар Эль Манша - наиболее молодая и современная часть, ориентированная на туристов. Повсеместно Вы можете найти множество базаров, магазинов, ресторанов, баров, дискотек, есть рынок, почтовое отделение, между-народный телефон, банки, пункты обмена валюты и т.д... В разделе «Куда пойти», а также у своего гида Вы можете получить дополнительную информацию о том, что Вас интересует.

Широко известный в Каире ТВ шеф Хишам Эль Банна приобрёл свой первый ресторан – El Banna's Gourmet Restaurant & Café – на Красном море, на знаменитом морском бульваре в Хургаде. До этого, имея уже за плечами 20 лет работы в Швейцарии, с 2012 года, он снимается в первом кулинарном шоу на египетском ТВ в сотрудничестве с Nile TV Family и CBC Sofa, что принесит ему большую известность и популярность не только в Египте, но и во всем Арабском мире! Так вот теперь отдавать оригинальные авторские блюда швейцарской, итальянской, азиатской и восточной кухни от знаменитости можно прямо здесь, в его ресторане. Шеф Хишам уделяет особое внимание закупке качественных свежих продуктов, особенно специй, зелени и некоторых ингредиентов для оригинальных соусов и подливок. Блюда из морепродуктов (наиболее изюм (!) с расположенного неподалёку у причала рынка), среди которых вождельный Лобстер Термидор, – особенно рекомендуем попробовать.

Неприменно воспользуйтесь таким уникальным шансом и закажите ужин для семьи, друзей или сотрудников вашей компании. Шеф Хишам с большим удовольствием приготовит ваши любимые блюда в авторской интерпретации. Добро пожаловать и приятного всем аппетита!

Der gemütliche Loungebereich, direkt vor dem Restaurant, lädt mit großer Videoleinwand zum Schauen von Sportevents ein, aber auch zum Relaxen und entspanntem Plaudern mit Freunden. Für alle Frostbeulen unter euch ist auch gesorgt, denn der Außenbereich ist mit modernsten Heizpilzen ausgestattet, sodass niemand frieren muss.

Ресторан Майнцер, расположенный на Мамше сразу после гостиницы Гранд Резорт открылся осенью 2016г., но уже успел завоевать симпатии всех резидентов немецкого происхождения и не только! И это не случайно! В первую очередь, это заслуга немецкого шеф повара, знающего все тонкости и премудрости немецкой и многих других национальных кухонь. Немецкий менеджмент опять же выгодно отличается своей точностью и пунктуальностью от стандартно-египетского. Современный дизайн, душевная атмосфера общины, комфортная мебель как внутри – в зале, так и снаружи на защищенной от прохладного зимнего ветра террасе, также оборудованной экранами (и в случае необходимости обогревателями). Любители кальяна будут приятно удивлены уникальностью прозрачного устройства, предназначенного для курения ароматного табака. Обычный кальян тоже имеется. Но интереснее – прозрачный стеклянный, где даже табак виден через стекло! Добро пожаловать в Майнцер! Хоть с семьей, хоть с друзьями или большой и шумной компанией, – всем места хватит!

## Have Archaeologists Discovered the Tomb of King Tut's Wife?

A documentary on the dig for the body of Ankhesenamun who 'married her father, her grandfather AND her half-brother' could reveal new clues. Radar scans of the area detected a possible tomb entrance buried underground. Researchers are keeping tight-lipped about what they have found so far. Discovery Channel has 'exclusive' access to film the excavations, which suggests a discovery may have been made.

Since January 2018, a team of about 100 Egyptian workers has been excavating an area in the Western Valley of the Valley of the Kings that may contain an undiscovered tomb. However, the Discovery Channel, which is funding the research, has released a photo of these excavations taking place in an area where a radar reading suggests a tomb entrance is located.

Previous excavations in the area had revealed four foundation deposits that contained pottery, flint blades and the skull of a cow. Deposits like these were often buried by the ancient Egyptians before they began construction of a tomb, archaeologists say. Additionally, radar scans near those deposits showed a structure that may be the entrance to a tomb. The deposits are located near the tomb of Ay, a pharaoh who succeeded Tutankhamun. After King Tut's death, his wife, Ankhesenamun, remarried Ay, and archaeologists have speculated that if an undiscovered tomb is present, it could belong to her. Ay ruled immediately after King Tut, from 1327 to 1323 BC. Ankhesenamun was the third child of Pharaoh Akhenaten and Nefertiti and was born in around 1348 BC. She was the half sister and cousin of Tutankhamun, with the pair sharing the same father. The queen is said to have married King Tut when he took the throne at the age of nine, when she was just a few years older. After their marriage the pair changed their names in honor of the old monotheistic religion that they reverted back to. She was originally called Ankhesenpaaten, but her change of name reflects changes in Ancient Egyptian religion during her lifetime.

Some records suggest she married her grandfather after the death of King Tut. Others say that she was briefly the wife of her father beforehand. **Zahi Hawass**, an archaeologist and former Egyptian antiquities minister who is leading the excavations said that he cannot comment publicly about what his team has found at this time. In Egypt, archaeologists often wait until the antiquities ministry gives them permission to announce a discovery.

## Египетские археологи, возможно, нашли гробницу жены Тутанхамона

Помимо причин и истории смерти Тутанхамона, археологи и египтологи сегодня активно спорят о том, где была захоронена его жена Анхесенамон, дочь царицы Нефертити и знаменитого фараона-реформатора Аменхотепа, приходившаяся ему сестрой по отцовской линии. В гробнице Тутанхамона было найдено несколько мумий женщин и девочек, одна из которых является его дочерью, а вторая — может быть как и Анхесенамон, так и его сестрой.

Анхесенамон пережила Тутанхамона и правила после его смерти несколько лет, выйдя замуж за бывшего верховного советника фараона, Эйе, жреца бога Амона. По этой причине многие египтологи полагают, что царица была захоронена отдельно от своего первого мужа, в другой гробнице в Долине Царей. Так как ее мумия так и не была найдена, споры о ее захоронении продолжают и по сей день. Летом этого года Захи Хавасс, известный археолог и бывший министр по делам древностей Египта, заявил, что его команде удалось найти предположительный вход в гробницу Анхесенамон, расположенную глубоко под землей рядом с усыпальницей Эйе. Он пообещал лично возглавить раскопки и доказать, что это действительно так.

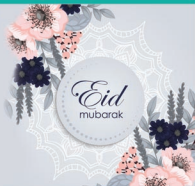

Эти раскопки начались в январе этого года. В них участвовало свыше ста археологов и их добровольных помощников, чьи результаты работы пока держатся в секрете от публики по воле телеканала Discovery, спонсирующего эти раскопки, и министерства по делам древностей.

С другой стороны, на сайте канала были недавно опубликованы первые фотографии с раскопок, которые говорят о том, что Хавассу и его единомышленникам действительно удалось найти вход в гробницу. Сам археолог не подтверждает, но и не отрицает этого.
